O'Connell Electric Company
830 Phillips Road
Victor, NY 14564

Dear O'Connell Electric Team:

Thermo Fisher Scientific would like to recognize you for outstanding team performance resulting in the flawless execution and early delivery of the first Matrix 2-Shot closure mold. Your efforts enabled our company to successfully expand the capacity of our Laboratory Plastics Essentials business and make a direct impact in the fight to end a global pandemic.

The O'Connell Electric team was posed with a difficult challenge and asked to go above and beyond the predictable in unprecedented times. Together, the O'Connell Electric team not only met, but exceeded the challenges placed in front of them. Plans were executed with remarkable conviction, and the commitment, energy and passion displayed by those listed below speaks volumes about the integrity of your company and team members.

Special thank you to Gary Loveless, John Schuster, Dave Ferries, Andy Dohse and Bruce Vassallo for handling the project with exceptional accuracy, constant reliability and the highest professional integrity. In the eyes of Thermo Fisher Scientific, the O'Connell Electric team is a world class organization committed to customer success. The O'Connell Electric team is well deserving of this award and we are deeply grateful for your partnership.

Best Regards,

Manny Tavaréz
Vice President
LPE Global Operations

Bryan Carrigan
Director
